CONTENTS VOLUME 76 JUNE 1985

page 1 KRAMER, R. H. Extracellular matrix interactions with the apical surface of vascular endothelial cells

17 REITER, T., PENMAN, S. and CAPCO, D. G. Shape-dependent regulation of cytoskeletal protein synthesis in anchorage-dependent and anchorage-independent cells

35 SLUDER, G. and BEGG, D. A. Experimental analysis of the reproduction of spindle poles

53 LUTTY, G. A., MELLO, R. J., CHANDLER, C., FAIT, C., BENNETT, A. and PATZ, A. Regulation of cell growth by vitreous humour

67 DELTOUR, R. and DE BARSY, T. Nucleolar activation and vacuolation in embryo radicle cells during early germination

85 LO, C. W., FANG, D. and HOOPER, M. L. Gap-junctional communication in a communication-defective and in a communication-competent teratocarcinoma cell line

97 CUADRADO, A., NAVARRETE, M. H. and CÁNOVAS, J. L. The effect of partial protein synthesis inhibition on cell proliferation in higher plants

105 MORRIS, G. E., NGUYEN THI MAN, and HEAD, L. P. Monoclonal antibodies against a nucleolar protein from differentiating chick muscle cells

115 JOHNSON, R. T., SQUIRES, S., ELLIOTT, G. C., KOCH, G. L. E. and RAINBOW, A. J. Xeroderma pigmentosum D–HeLa hybrids with low and high ultraviolet sensitivity associated with normal and diminished DNA repair ability, respectively

135 HUNTER, G. J. and TURNOCK, G. *In vivo* transcription of ribosomal RNA in relation to the mitotic cycle in *Physarum polycephalum*

145 MORRIS, G. J., COULSON, G. E. and LEESON, E. A. Changes in the shape of mitochondria following osmotic stress to the unicellular green alga *Chlamydomonas reinhardii*

155 CHAMBERS, T. J. and FULLER, K. Bone cells predispose bone surfaces to resorption by exposure of mineral to osteoclastic contact

167 SMITH, G. P., SHARP, G. and PETERS, T. J. Isolation and characterization of alkaline phosphatase-containing granules (phosphasomes) from human polymorphonuclear leucocytes

179 FUJISHIMA, M. and FUJITA, M. Infection and maintenance of *Holospora obtusa*, a macronucleus-specific bacterium of the ciliate *Paramecium caudatum*

189 BUTTERWORTH, B. H. and LOKE, Y. W. Immunocytochemical identification of cytotrophoblast from other mononuclear cell populations isolated from first-trimester human chorionic villi

199 APLIN, J. D. and FODEN L. J. Defective adhesion to extracellular matrix leads to altered social behaviour in cultured fibroblasts

213 JUNKER, J. L. and WILSON, M. J. Divergent expression of laminin and fibronectin in non-tumorigenic and transformed liver epithelial cells

225 WITKOWSKI, J. A. and DUBOWITZ, V. Duchenne muscular dystrophy: studies of cell motility *in vitro*

235 INOUYE, K. Measurements of intracellular pH and its relevance to cell differentiation in *Dictyostelium discoideum*

247 REISS, H.-D. and HERTH, W. Nifedipine-sensitive calcium channels are involved in polar growth of lily pollen tubes

255 GOWING, L. R., TELLAM, R. L. and BANYARD, M. R. C. Actin synthesis in tumorigenic and non-tumorigenic human hybrid cells

269 SWALES, L. S. and LANE, N. J. Unusual structural features and assembly of gap and pleated septate junctions in embryonic cockroach CNS

283 Gleeson, P. A. and Hughes, R. C. Binding and uptake of the toxic lectin modeccin by baby hamster kidney (BHK) cells: Isolation of mutants defective in the internalization of modeccin

303 Traas, J. A., Braat, P., Emons, A. M. C., Meekes, H. and Derksen, J. Microtubules in root hairs

321 Zuberi, M. I. and Dickinson, H. G. Pollen–stigma interaction in *Brassica* III. Hydration of the pollen grains

337 Eichenlaub-Ritter, U. Spatiotemporal control of functional specification and distribution of spindle microtubules with 13, 14 and 15 protofilaments during mitosis in the ciliate *Nyctotherus*
